

PERMANENT MAKEUP BROWS

Aftercare Instructions

IMMEDIATELY AFTER THE PROCEDURE : For **the next 30 minutes** AFTER the treatment dab your brows with the cotton rounds in your aftercare kit to soak up any lymph fluid. (This prevents premature scabbing).

24 HOURS AFTER THE TREATMENT: Carefully **begin cleansing your brows**. Twice a day, morning & before bedtime. Gently dab a small amount of Dial antibacterial soap on a lightly moist paper towel (no rubbing or tugging at your brows). Gently clean soap off with clean lightly moist paper towel. Wait for brows to fully dry, **if they feel dry then apply a rice grain amount of ointment** (also in your aftercare kit). **If they feel fine, skip the ointment.** Repeat this for the next 10 days!

TIPS:

- Do not rub, tug or scrub your brows
- Try to sleep on your back while your eyebrows are healing
- Use protective visors for showering (provided in your kit)
- No shower stream over brows
- Wash face CAREFULLY with a washcloth or cleansing wipes, avoiding brow area
- Once brows are healed use facial sunscreen directly on your brows

FOR 10 DAYS

NO WATER

NO MAKEUP

NO SWEATING

FOR 30 DAYS

NO SUN

NO BOTOX

NO LASERS OR
CHEMICAL
PEELS
